

How to Turn your Invite List into an RSVP number

You have decided to tie the knot and are starting to talk with Vendors about
THE BUDGET!!!

But everyone you talk to needs a guest number...
So how do you turn your invite list into an RSVP number?!?!

Our simple rule we tell our guests is :

1. Put everyone on your invite list you know you are going to send out invitations to.
2. Cross off everyone you know won't come ... your moms great-aunt-grandma from Chattahoochee you met that one time when you were 5, your dad's boss, and your 3rd grade teacher ...
3. Now that you have your pared down list, you can count on about 80% of those guests RSVP'ing "Yes" to your event!

This number may slightly go up or down,
but it's a good number to work around!

This formula should help you create a more accurate guest number
to help your planning process and assist with your budgeting details!
