

*Secrets to a great outdoor event in the Texas hill country at La Escondida !*

*Let your guests know that you are having an outdoor event so that they can dress and plan accordingly.*

*Know the backup plan in case of rain or other inclement weather. There is over 4,000 square feet of covered space to bring the ceremony from the lawn to the Starlight Pavilion or Pond Patio and still have your reception. If you are only having a reception, no problem, your event is totally under covered space.*

*La Escondida Celebration Center is a dedicated outdoor venue and we have included amenities that will keep your guests happy.*

*Throughout the covered areas, there are fans and and porta coolers. Hand fans are available for summer months. In winter months we provide area heaters and small blankets. We always have a water station available and most packages include a lemonade station for your guests.*

*If you have elderly or special needs guests, let us know and we will seat them in an area that would be best for them.*

*Our lawn care includes weekly spraying for mosquitos and other insects. We have small cans available for individual spraying, if needed.*

*The Texas hill country temperature at La Escondida is usually between 5 and 7 degrees cooler than the San Antonio forecast. We have breezes almost all day and especially in the evening.*

*If you are planning an event between November and March (daylight savings time), we recommend you talk with the Event Coordinator about timing of ceremony and reception to get the best combination of daylight and nightlife hours.*

*Please let us know of any questions you may have!*
